4. [Custom Price in Frontend](#)

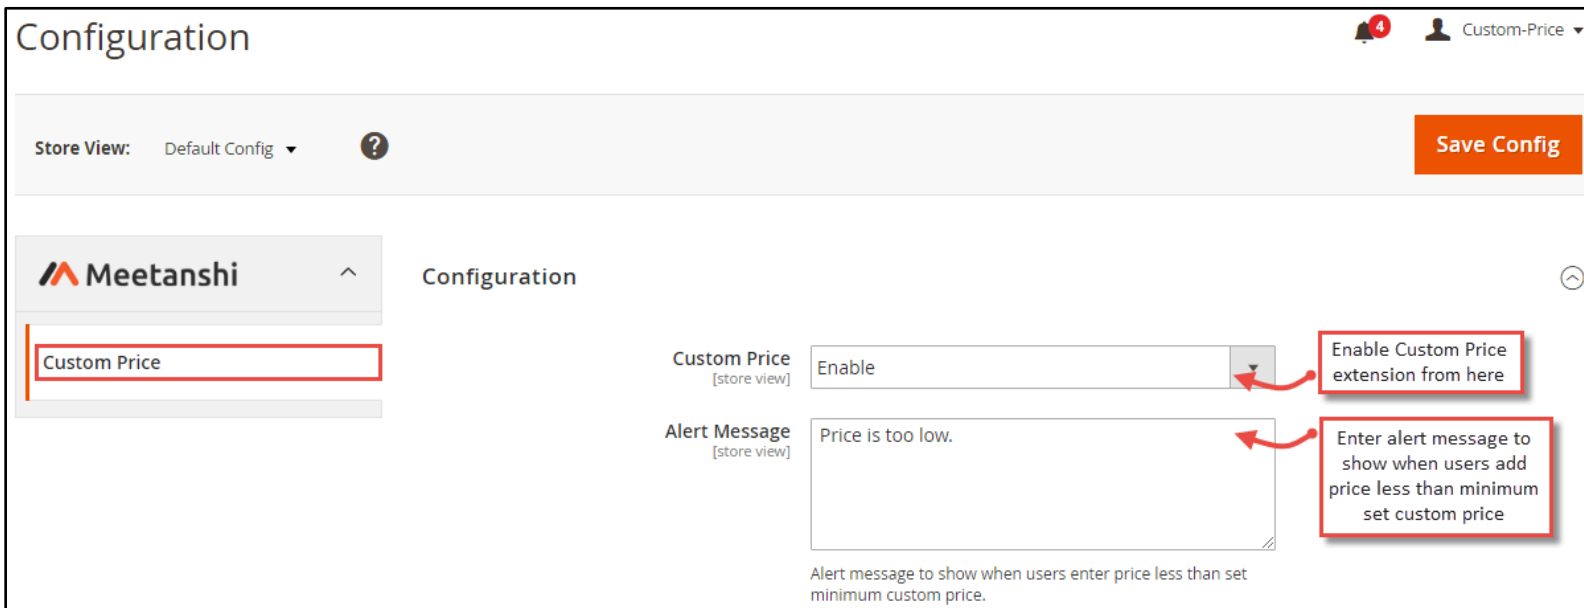

1. Extension Installation

- Extract the zip folder and upload our extension to root of your Magento 2 directory via FTP.
- Login to your SSH and run below commands step by step:
 - `php bin/magento setup:upgrade`
 - For Magento version 2.0.x to 2.1.x - `php bin/magento setup:static-content:deploy`
 - For Magento version 2.2.x & above - `php bin/magento setup:static-content:deploy -f`
 - `php bin/magento cache:flush`
- That's it.

2. Configuration

For configuring the extension, login to Magento 2, move to **Stores** → **Configuration** → **Custom Price** where you can find various settings to enable the extension.

- **Custom Price:** Enable or disable the Custom Price extension from here.
- **Alert Message:** Enter alert message to show when users add lesser price than added minimum custom price.

The screenshot displays the Magento 2 Configuration interface for the Custom Price extension. The page title is 'Configuration' and the user is logged in as 'Custom-Price'. The 'Store View' is set to 'Default Config'. A 'Save Config' button is visible in the top right corner. The 'Custom Price' extension is highlighted in the left sidebar. The main configuration area shows the 'Custom Price' dropdown menu set to 'Enable' and the 'Alert Message' text area containing 'Price is too low.'. Red boxes and arrows highlight these elements with explanatory text:

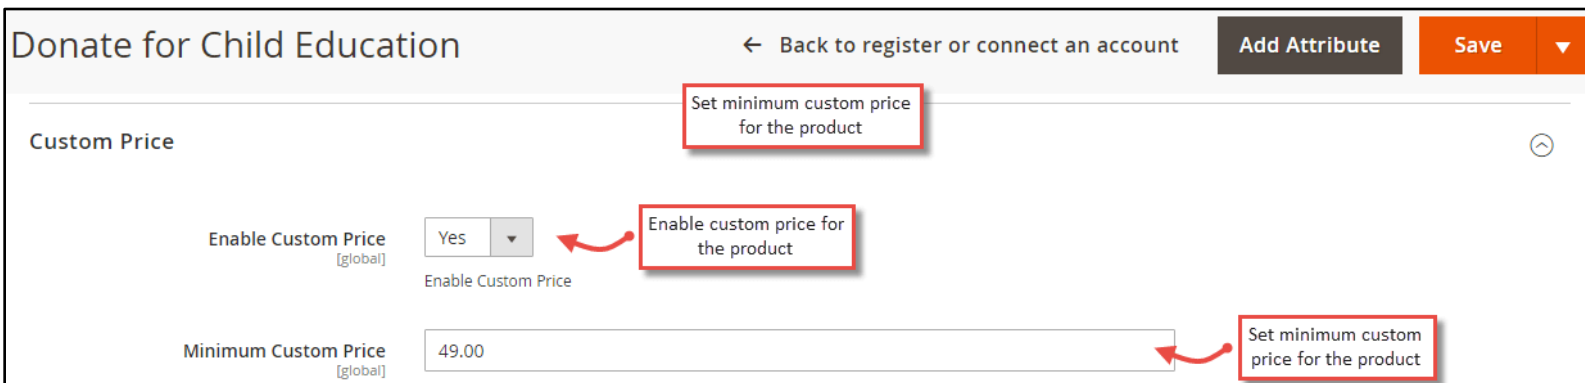

- Custom Price:** Enable Custom Price extension from here
- Alert Message:** Enter alert message to show when users add price less than minimum set custom price

Alert message to show when users enter price less than set minimum custom price.

3. Setting Custom Price for Products

Once you enable the extension, you need to enable custom price for products you want to allow. Navigate to **Catalog** → **Products** and select the product for which you want to enable custom price. **Edit** product and find **Custom Price** tab under which you can make necessary settings.

- **Enable Custom Price:** Set YES to enable custom price for the selected product.
- **Minimum Custom Price:** Set minimum price for the product to allow checkout as custom price in frontend.

Minimum Custom Price [global] Set minimum custom price for the product

4. Custom Price in Frontend

Once you have configured the extension successfully, whenever users add products with custom price into the shopping cart, it checks for the minimum price set and then allows checkout.

- **Alert Message**

If customers add custom price less than set minimum price, they get an alert message as set from the backend.

The screenshot displays a product page for "Donate for Child Education". At the top, a navigation breadcrumb shows "Home > Donate for Child Education". A red alert banner at the top left contains a red 'x' icon and the text "Price is too low.". Below this, a red box highlights the alert message: "Alert message for adding price less than set minimum custom price", with a red arrow pointing to the alert banner. The main product image shows a glass jar filled with gold coins, with a white card that says "DONATE" in large, bold, black letters. To the right of the image, the product title "Donate for Child Education" is displayed, along with the text "Be the first to review this product". Below the title, it says "IN STOCK" and "SKU#: Donate for Child Education". The product form includes a "Custom Price" input field, a "Qty" input field with the value "1", and a blue "Add to Cart" button. At the bottom of the product section, there are three icons: a heart for "ADD TO WISH LIST", a bar chart for "ADD TO COMPARE", and an envelope for "EMAIL".
