

Currency Switcher for Magento

User Guide

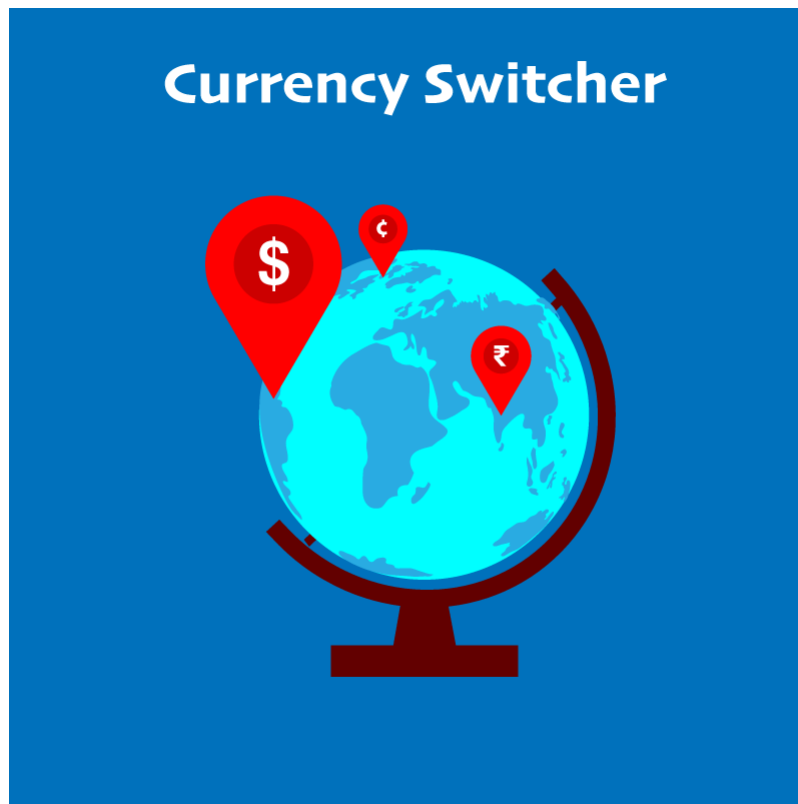

Table of Content

1. [Extension Installation](#)
2. [Configuration](#)
3. [Currency Switcher in Frontend](#)

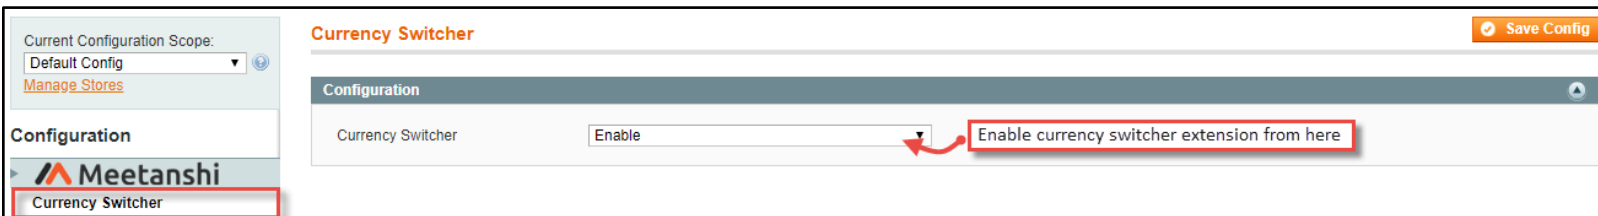

1. Extension Installation

- Upload or copy all folders in the zip package to your Magento root folder. It doesn't overwrite any existing files but just adds new files to the folder structure.
- Once done, log in your Magento admin panel, go to **System** → **Cache Management**, select all caches and refresh.
- Navigate to **System** → **Configuration**, if you can see the extension tab, it is installed properly.
- If you get Access denied error, you need to log out admin panel and log in again.

2. Configuration

For configuring the extension, login to Magento, move to **System** → **Configuration** → **Currency Switcher** where you can find the settings to enable the extension.

- **Currency Switcher:** Enable the Currency Switcher extension as shown below.

The screenshot shows the Magento admin panel configuration page for the Currency Switcher extension. On the left sidebar, the 'Configuration' menu is expanded, and 'Currency Switcher' is selected. The main content area shows the 'Currency Switcher' configuration with a dropdown menu set to 'Enable'. A red box highlights the 'Enable' dropdown, and a red arrow points to it with the text 'Enable currency switcher extension from here'. A 'Save Config' button is visible in the top right corner.

3. Currency Switcher in Frontend

The extension identifies the GeoIP location of the user and displays the currency of the products accordingly. Here are some of the examples of web page visits from the different IP addresses and currency auto switch accordingly.

- **Page Visit from USA**

The extension identifies the IP address from US and hence the price is displayed in USD.

HOME / CURRENCY SWITCHER / MEN T-SHIRT

Page visit from the IP of US

MEN T-SHIRT \$59.00

IN STOCK

Men T-Shirt

Size * * Required Fields
