1. Site Key Registration

To use the Magento Google Invisible reCAPTCHA, one needs to register the domain to obtain site key and secret key as shown below:

Choose the type of reCAPTCHA, here, invisible reCAPTCHA. Enter your domain name and accept their terms of services. Once you register, you will get the required details.

The screenshot shows the reCAPTCHA registration interface. At the top left is the reCAPTCHA logo. A red box highlights the text: "Register your domain to get site key & secret key to use invisible reCAPTCHA". Below this is the heading "Register a new site".

Label
For example, example.com: Comments page

Choose the type of reCAPTCHA ?

- reCAPTCHA V2
Validate users with the "I'm not a robot" checkbox.
- Invisible reCAPTCHA
Validate users in the background.
- reCAPTCHA Android
Validate users in your android app.

Domains

2. Extension Installation

- Upload or copy all folders in the zip package to your Magento root folder. It doesn't overwrite any existing files but just adds new files to the folder structure.
- Once done, log in your Magento admin panel, go to **System → Cache Management**, select all caches and refresh.
- Navigate to **System → Configuration**, if you can see the extension tab, it is installed properly.
- If you get Access denied error, you need to log out admin panel and log in again.

3. Configuration

To configure the extension, login to Magento backend, move to **System → Configuration → Google Invisible reCAPTCHA** where you can find various settings to configure the extension.

- **Google Invisible reCAPTCHA:** Enable the Google Invisible reCAPTCHA extension.
- **Captcha Key:** Enter the site key obtained while registration.
- **Secret Key:** Enter the secret key obtained while registration.
- **reCAPTCHA theme:** The reCAPTCHA theme can be selected from here, i.e., light or dark.
- **Badge Position:** Set the badge position from the drop down menu.
- **Language:** This field is to be left empty for Google to auto detect the language.
- **URLs to enable:** Enter the URLs of your webpage to enable the reCAPTCHA on.
- **Selectors for form:** Add form selectors to enable the reCAPTCHA for.

The screenshot shows the 'Invisible Recaptcha' configuration page in the Magento admin panel. The left sidebar shows the navigation menu with 'System' selected and 'Configuration' expanded. The main content area is titled 'Invisible Recaptcha' and contains the following configuration fields:

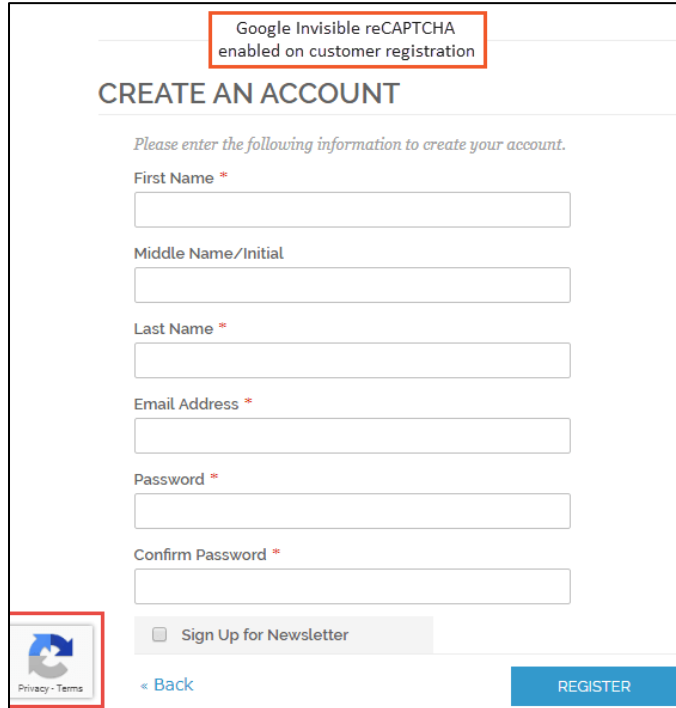

- Google Invisible Recaptcha:** A dropdown menu set to 'Enable'. A red callout box points to this field with the text: 'Enable or disable extension from here'.
- Captcha Key:** A text input field containing a site key. A red callout box points to this field with the text: 'Enter site key & secret key you have got while registration for reCAPTCHA'.
- Secret key:** A text input field containing a secret key. A red callout box points to this field with the text: 'Enter site key & secret key you have got while registration for reCAPTCHA'.
- reCAPTCHA Theme:** A dropdown menu set to 'Light'. A red callout box points to this field with the text: 'Select reCAPTCHA theme'.
- Badge Position:** A dropdown menu set to 'Bottom Right'. A red callout box points to this field with the text: 'Set badge position to show in frontend'.
- Language:** A dropdown menu set to 'en'. A red callout box points to this field with the text: 'Set language code for reCAPTCHA, leave empty for Google to auto detect'.
- URLs to Enable:** A text area containing the following URLs: 'customer/account/createpost', 'customer/account/loginPost', 'review/product/post', and 'contact/index/post'. A red callout box points to this field with the text: 'Enter URLs to enable Google invisible recaptcha on'.
- Selectors for forms:** A text area containing the following form selectors: 'form[action*="customer/account/createpost"]', 'form[action*="customer/account/loginPost"]', 'form[action*="review/product/post"]', and 'form[action*="contact/index/post"]'. A red callout box points to this field with the text: 'Add form selectors to enable Google invisible recaptcha for'.

4. Google Invisible reCAPTCHA in frontend

After the settings are configured the desired results will be seen in the frontend.

- **Google Invisible reCAPTCHA on customer registration**
