

Image Clean for Magento User Guide

Table of Content

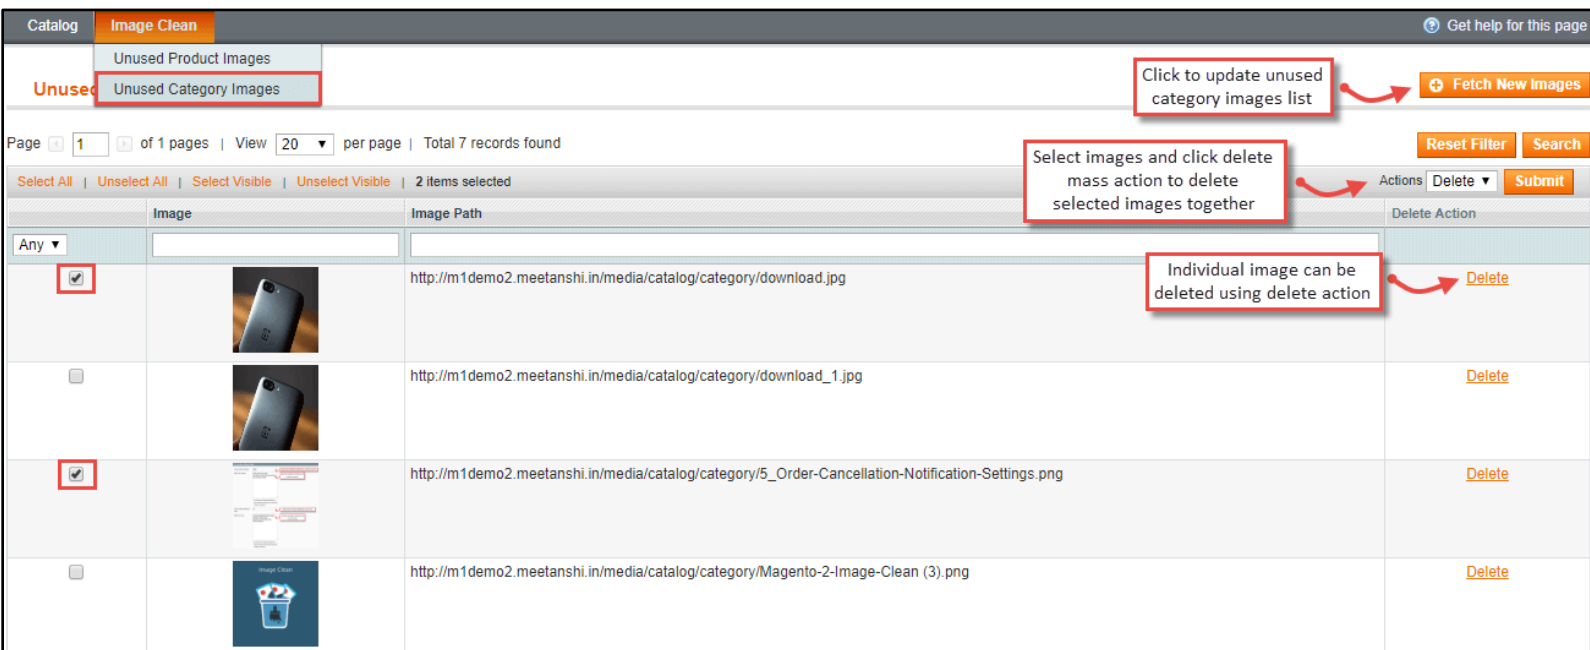

1. [Extension Installation Guide](#)
2. [Image Clean in Backend](#)

1. Extension Installation

- Upload or copy all folders in the zip package to your Magento root folder. It doesn't overwrite any existing files but just adds new files to the folder structure.
- Once done, log in your Magento admin panel, go to **System → Cache Management**, select all caches and refresh.
- Navigate to **System → Configuration**, if you can see the extension tab, it is installed properly.
- If you get Access denied error, you need to log out admin panel and log in again.

2. Image Clean in Backend

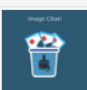

- **Unused Category Images**
The extension enables to delete the unused category images from **Image Clean → Unused Category Images**. Click "**Fetch New Images**" button to fetch new unused images from categories and update the list. These images can be deleted using mass delete action or individually using delete action.

Click to update unused category images list → [Fetch New Images](#)

Select images and click delete mass action to delete selected images together → [Delete](#) [Submit](#)

Individual image can be deleted using delete action → [Delete](#)

	Image	Image Path	Delete Action
<input checked="" type="checkbox"/>		http://m1demo2.meetanshi.in/media/catalog/category/download.jpg	Delete
<input type="checkbox"/>		http://m1demo2.meetanshi.in/media/catalog/category/download_1.jpg	Delete
<input checked="" type="checkbox"/>		http://m1demo2.meetanshi.in/media/catalog/category/5_Order-Cancellation-Notification-Settings.png	Delete
<input type="checkbox"/>		http://m1demo2.meetanshi.in/media/catalog/category/Magento-2-Image-Clean (3).png	Delete

- **Unused Product Images**

The extension allows to update the list of unused product images and delete them from **Image Clean** → **Unused Product Images**. On click of “**Fetch New Images**” button, new unused images from product media get fetched and listed in the grid. These images can be deleted after selection using mass delete action. Also, you can delete individual image using delete action.
